more

Giovane azienda nata nel 2007 con l'obiettivo di rispondere alle moderne esigenze del mercato contract, Chairs & More da subito si propone al mercato internazionale con le sue collezioni dal design estremamente lineare come la poltroncina So Pretty e le sedute Gotham.
L'attenzione per il comfort, la qualità dei materiali e la produzione accurata consentono all'azienda di crescere rapidamente proponendo ogni anno nuove collezioni e ottenendo riscontri da parte del mercato e della stampa internazionale che ne riconoscono la forte personalità e l'impegno costante nella ricerca di nuovi concept di prodotto.

Young company founded in 2007 to respond to the modern needs of the contract market, Chairs & More immediately presents itself to the international market with its linear design collections such as the So Pretty armchair and Gotham chair.
The attention to comfort, the quality of the materials and the careful production allow the company to grow rapidly by offering new collections every year and obtaining feedback from the market and the international press that recognizes their strong personality and constant commitment to search for new product concepts.

Nel 2014 Chairs & More si apre a collaborazioni con giovani designer, nascono così la collezione Churros disegnata da Kazuko Okamoto che interpreta il concetto di modularità di seduta in modo radicale, e, per la prima volta, la collezione Jujube dedicata all'outdoor disegnata da Antonio de Marco e Simone Fanciullacci. Da allora, l'azienda, è continuamente impegnata a sviluppare nuovi prodotti selezionando giovani e talentuosi designer tra cui Tommaso Caldera, con il quale vince il secondo premio Young Design 2017 con la poltroncina Mousse al Salone del Mobile di Milano, e lo studio Pastina con la nuova collezione Chips. Dalla collaborazione con Roberto Paoli nascono invece le collezioni Babah e Nube, quest'ultima realizzata con un innovativo poliuretano morbido FreeForm.

In 2014, Chairs & More starts the collaboration with young designers; Kazuko Okamoto designs the Churros collection, which interprets the concept of modular seating, Antonio de Marco and Simone Fanciullacci design the Jujubee for outdoor use. Since then, the company has been continuously committed to developing new products by selecting young and talented designers like Tommaso Caldera, winning the second award at the Young Design 2017 with the Mousse armchair presented at the Salone del Mobile in Milan, and the Pastina Design Studio with the Chips collection.
Roberto Paoli designs the Babah collection, in rigid polyurethane, and the Nube collection, with the seat in innovative FreeForm soft polyurethane.

Nel 2020 Chairs & More amplia ulteriormente la propria gamma di sedute per esterno proponendo ben 3 collezioni che interpretano in modo differente il tema dell'intreccio: Altana, disegnata da Antonio de Marco, Millie dello Studio Pastina e Klot nata dalla nuova collaborazione con i giovanissimi designer di AM Studio.

In 2020 Chairs & More expands its range of outdoor seating by offering 3 collections that interpret the theme of weaving in a different way: Altana, designed by Antonio de Marco, Millie from Studio Pastina and Klot created by the new collaboration with young designers by AM Studio.

"Ci rivolgiamo a chi sceglie il design ma non perde di vista la comodità, a chi è attratto dall'originalità ma non vuole l'eccesso, a chi ricerca la qualità e apprezza la disponibilità a collaborare riconoscendo che il servizio è una componente fondamentale di ciò che viene offerto".

Marco Roseano

"We turn to those who choose design but do not lose sight of comfort, to those who are attracted by originality but do not want excess, to those who seek quality and appreciate the willingness to collaborate, recognizing that service is a fundamental component of what is offered".

Altana

Antonio De Marco

Altana è una collezione di poltroncine e lounge in metallo dalle dimensioni generose ed avvolgenti. Il decoro con cordino nautico alleggerisce e riveste l'intera seduta divenendo un elemento caratteristico della collezione. Le forme e il disegno stesso dell'intreccio riprendono e reinterpretano lo stile coloniale delle sedute outdoor secondo l'interpretazione di Antonio De Marco.

Altana is a collection of metal armchairs and lounge armchiars with generous and enveloping dimensions. The decoration with marine rope lightens and covers the entire seat, becoming a characteristic element of the collection. The shapes and the design of the weave take up and reinterpret the colonial style of the outdoor seats according to the interpretation of Antonio De Marco.

Struttura in metallo verniciato a polveri colore antracite, corda marina colore antracite.

Anthracite powder coated metal frame, woven with anthracite marine rope.

Struttura in metallo verniciato a polveri per uso esterno, antracite, oppure sabbia. Intrecciata a mano con corda marina.

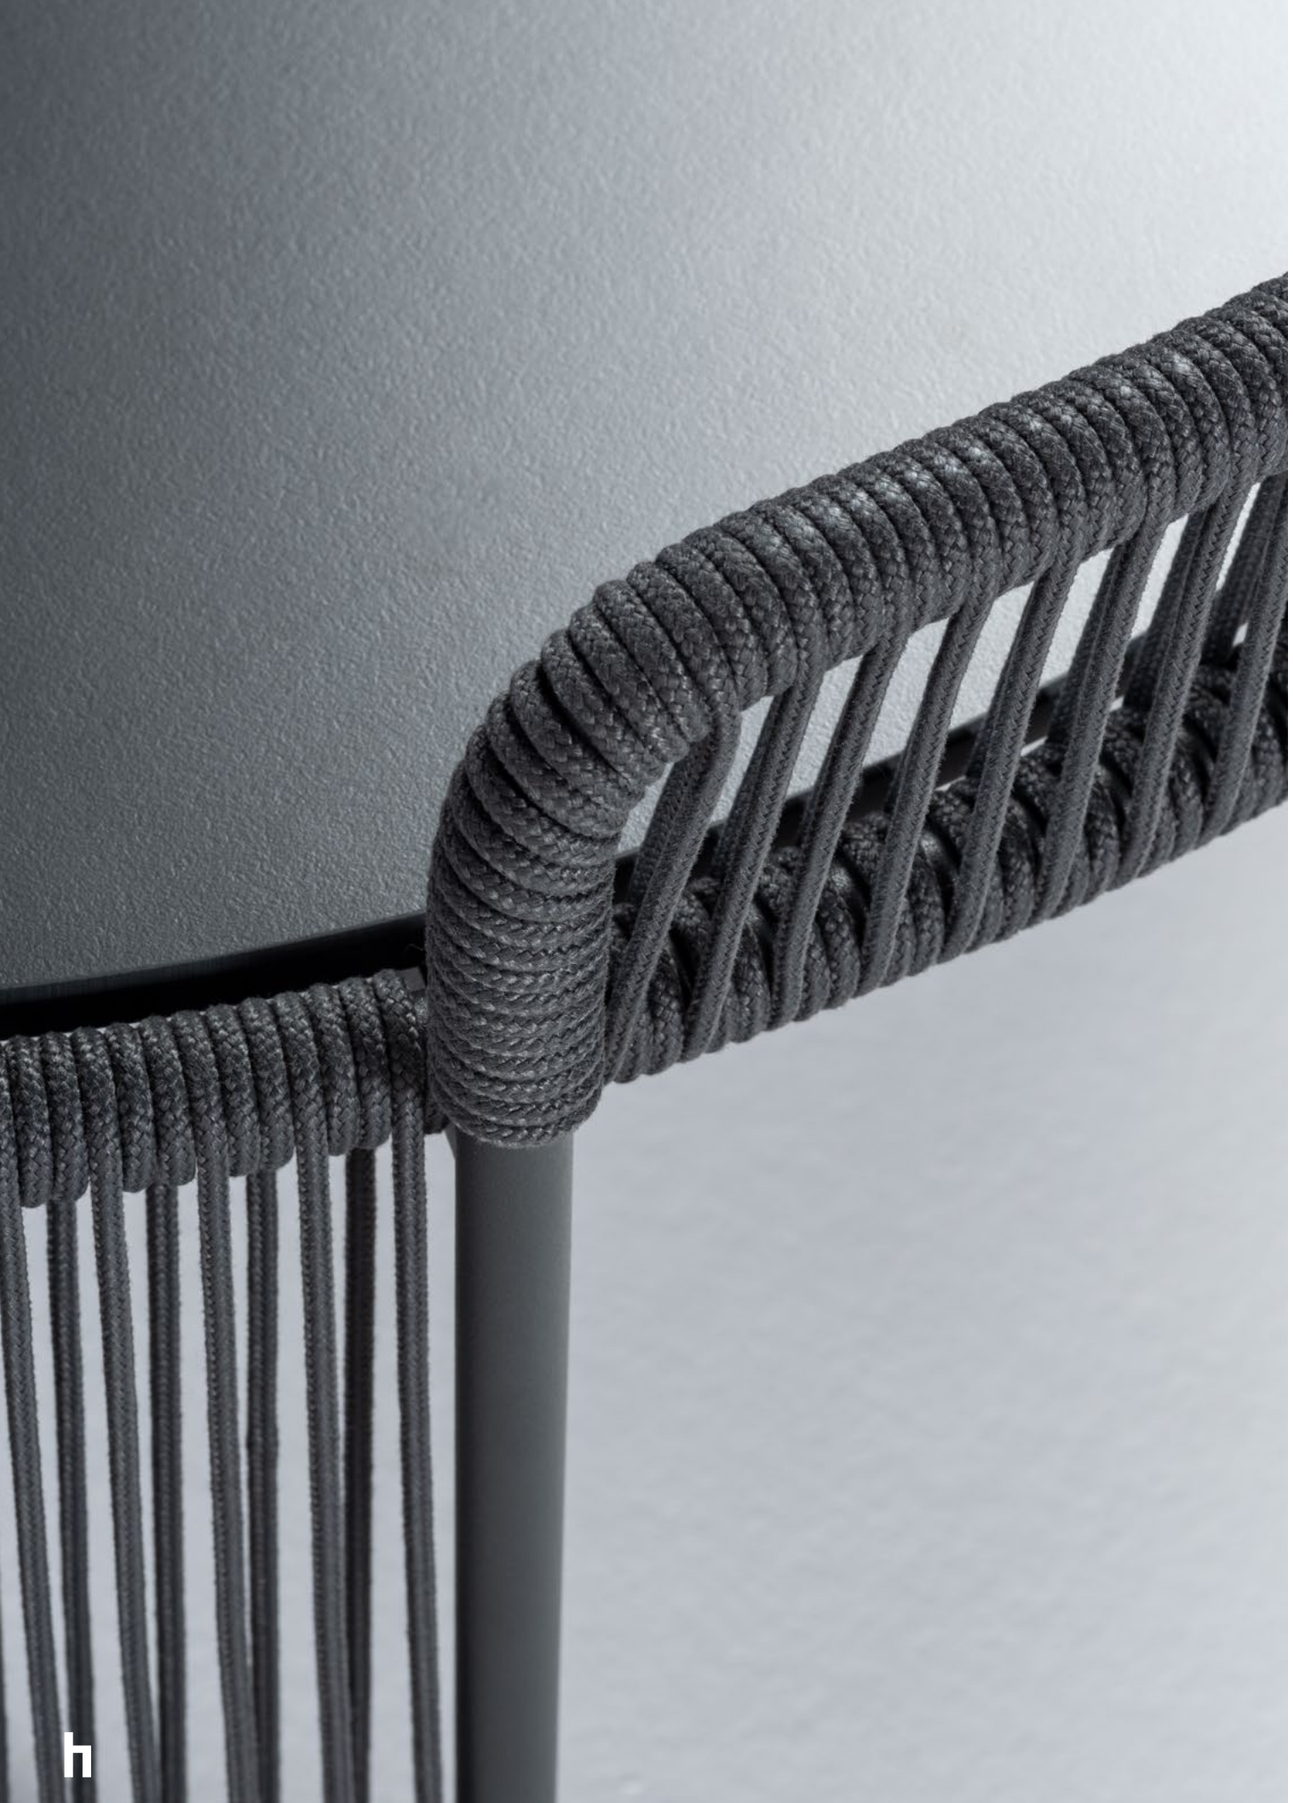

Powder coated metal frame for outdoor use, anthracite or sand. Hand woven with marine rope.

La serie di tavolini Altana è disegnata da Antonio de Marco nel 2021 per Chairs & More. Disponibili in tre dimensioni si accostano perfettamente tra di loro permettendo di creare diverse combinazioni.

La struttura in acciaio verniciato a polveri, in colore antracite oppure sabbia, è arricchita dall'intreccio fatto a mano con corda marina. Il piano in HPL, disponibile in quattro tinte, si abbina ai colori delle corde adattandosi ad ambienti outdoor residenziali oppure contract.

Antonio de Marco designs the Altana coffee tables collection in 2021 for Chairs & More. Available in three sizes, they perfectly match each other, allowing the creation of different combinations.

The powder coated steel structure, in anthracite or sand color, is enriched by the handmade weave with marine rope. The HPL top, available in four colours, matches the ropes, adapting to outdoor residential or contract environments.

Babah

Roberto Paoli

Babah è una seduta accattivante e piena di personalità. Presenta compostezza di linee, proporzioni e toni che la rendono al tempo stesso classica e innovativa. La sua figura essenziale è ingentilita dal decoro dello schienale, caratterizzato da linee verticali che appaiono come cuciture di una imbottitura morbida, in realtà si tratta di effetti ottenuti dallo stampaggio di poliuretano rigido, ignifugo che mantiene apprezzabili le caratteristiche di facile pulizia, resistenza e leggerezza.
Il risultato è un'estetica che riesce a dosare in modo equilibrato e armonioso lo stile classico retrò con la tecnologia dei nuovi materiali adatti in particolare ad un utilizzo contract. Babah è disponibile sia con base a 4 gambe, facilmente impilabile, sia nella versione a slitta.

Babah is attractive and full of personality. Babah is a collection of chairs characterized by proportions and lines that make it both classic and contemporary. This chair can be placed in multiple environments, heterogeneous in style and purpose.
With its slightly 'retro' look, Babah is an timeless essential.The design is softened by the decorum of the back, characterized by vertical lines that look like seams of a soft padding but are the result of the mold of rigid polyurethane, flame retardant, easy to clean, durable and lightweight. Babah is available with 4 legs, easy to stack, either in a slide.

Scocca bicolore sabbia—fango

Scocca in poliuretano rigido ignifugo. Base in metallo verniciato nero, bianco o cromato.

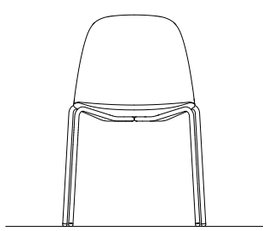

Rigid polyurethane shell fire retardant. Black, white painted or chrome metal frame.

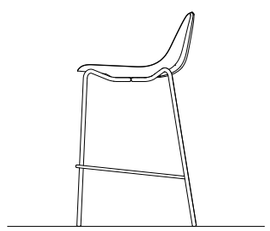

Babah è disponibile nella versione con 4 gambe di metallo cromato o verniciato facilmente impilabile.
La scocca si presenta in diverse colorazioni nelle tinte naturali e neutre del moka, grigio, fango, crema, bianco e nero, e in quelle più accese del giallo, cielo e con 3 varianti bicolore tono su tono, chiaro all'interno e scuro all'esterno.

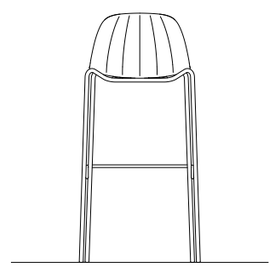

Tutte queste nuances in gradazione creano particolari effetti cromatici di dinamismo e armonia sia nella disposizione in gruppo che nell'allocazione impilabile delle sedute.

Babah shell comes in different colors of natural and neutral shades like moka, gray, mud, cream, black, white or in bright colors like yellow, sky-blue, and also with bicolor tonal variations, light inside and dark outside.

All these nuances create special color effects of dynamism and harmony, particularly with the neutral colors, both when the chairs are placed in group or stacked.

Scocca in poliuretano rigido ignifugo. Base in faggio naturale o laccato nero o bianco.

Rigid polyurethane shell fire retardant. Base in natural or lacquered beech black or white.

La collezione Babah presenta anche una linea di sedute e sgabelli realizzati con una originale base in essenza di faggio naturale o laccato opaco. Si tratta di una variante che integra le gambe in massello tornito con una struttura in tondino di metallo dal design estremamente leggero e contemporaneo.

L'effetto è una composizione molto accattivante resa dall'accostamento di differenti elementi materici e cromatici che permettono alla seduta di trovare collocazione anche in contesti residenziali, oltre che in differenti ambiti contract.

The Babah collection also offers a range of chairs and stools realized with an original base in natural or matt lacquered beech wood. Integrating a solid turned wooden legs with a metal rod frame, this version is characterized by a light and contemporary design.

The result is an attractive composition through the combination of different materials and color elements allowing the Babah to be easily placed in residential areas or public spaces.

Frassino - Ash

Un sapore vagamente retrò caratterizza la collezione Cacao, una famiglia completa di sedia, sgabelli e poltroncina in frassino con seduta in multistrato. Ogni variante esprime uno stile informale ma di tendenza ideale per gli ambienti moderni e per coloro che desiderano con questi arredi evocare uno stile tradizionale sia in contesti residenziali sia in ambiti contract come ristoranti, alberghi, bar.
Le finiture sono naturale o tinto noce; per le lacche opache sono disponibili le tinte nero, bianco, giallo intenso “segnale” e grigio “traffico”.

A retro style characterizes the Cacao collection which consists of a chair, stool and armchair.
The mix of materials and design make this collection ideal for contract environments, as well as domestic ones. Cacao is also available with the ash frame in a choice of finishes: natural or walnut stained, or matt lacquered black, white, “signal” intense yellow or “traffic” grey.

Chips

Studio Pastina

Allegra e contemporanea, la collezione Chips cattura da subito il nostro sguardo e comunica in modo deciso il suo stile giovane e disinvolto. Una collezione di sedute e sgabelli in cui lo schienale è senz'altro l'elemento iconico più evidente e significativo che identifica l'intera collezione. La forma stondata, ampia e generosa sembra travalicare i suoi consueti limiti funzionali espandendosi oltre la base del sedile e andando a ridefinire il proprio spazio in modo nuovo per creare un design originale e accattivante.
Il risultato è una seduta che gioca su un doppio contrasto di volumi, quello orizzontale predominante dello schienale, e quello verticale sottostante delle basi. Le gambe della seduta sono infatti molto slanciate e lineari soprattutto nella versione a slitta in metallo oltre che in quella in faggio. La linearità verticale delle basi, in dialogo con la forma allungata dello schienale, è ancora più evidente negli sgabelli a doppia altezza.

Sleek and slick, the Chips collection is a true eye-catcher, with its unmistakably upbeat, trendy style. A set of chairs and stools, the back of which is without doubt their most iconic and characterising feature. With its ample curves and generous size, it almost seems to transcend the limits of mere functionality, and by extending beyond the seat, it redefines its space in novel ways, giving rise to an original and captivating creation. This is a design that plays with a double contrast of volumes, the horizontal one dominated by the back, and the upright one, stretching out beneath the seat. The legs are sleek and slender, most notably in the models endowed with either a metal sled base or beech legs. The vertical linearity of the bases, complemented by the elongated shape of the back, is particularly evident in the double- height stools of this collection.

La collezione Chips prevede la variante SL con base a slitta in tondino di metallo nero opaco. La scocca è realizzata in multistrato di faggio e rivestita con tessuti in similpelle o velluto disponibili in un'ampia scelta di tonalità contemporanee oltre che in tessuti acrilici lavorati con nuovi effetti melange tono su tono. Tutti i rivestimenti sono ignifughi e facilmente pulibili. La collezione Chips SL oltre alla sedia prevede anche gli sgabelli con altezze rispettivamente di 65 cm e 80 cm.

The Chips collection includes the SL variant featuring a matt black metal sled base. The chairs have a multilayer beech frame, upholstered with faux leathers and velvets available in a wide range of fashionable hues, as well as acrylic melange fabrics conveying a trendy, ton sur ton look. All materials are fire retardant and easy to clean. As well as the chairs, the Chips SL collection also includes 65 cm and 80 cm high stools.

Scocca in multistrato con rivestimento in tessuto e base in legno di faggio verniciato o laccato opaco.

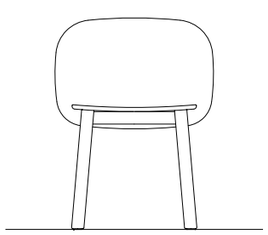

Upholstered ply wood shell and polished or matt lacquered beech wood base.

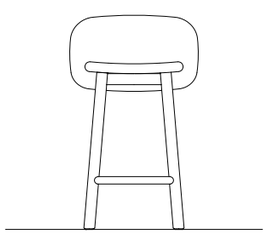

La collezione Chips prevede anche la versione con la base in legno di faggio massello per uno stile di seduta più classico e naturale. L'essenza è disponibile sia con finitura verniciata che laccata opaca nella tinta del nero.

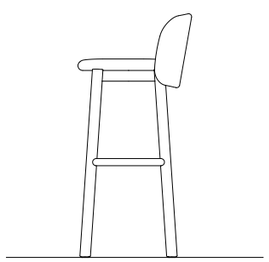

Le varianti, anche in questo caso, sono tre e prevedono la seduta con altezza regolare di 46 cm e gli sgabelli adatti sia a banconi da cucina, e quindi con altezza 65 cm, che da bar con altezza 80 cm.

The Chips collection also includes the version with a solid beech wood base for a more classic and natural style. Beech wood is available in both polished or matt lacquered finishes.

Also in this case there are three variants and they include a seat with a regular height of 46 cm and stools suitable both for kitchen counters, and therefore with a height of 65 cm, and for bars with a height of 80 cm.

Churros

La collezione Churros esprime e integra due concetti essenziali per una seduta contemporanea: la fruibilità d'uso e la modularità di composizione, rispondendo in modo completo alle evolute esigenze d'arredo in particolare del settore contract. Churros è realizzato con l'innovativo poliuretano Polyplus, per uso esterno, dalla texture liscia e morbida al punto da farsi apprezzare proprio per il suo aspetto soffice, confortevole e compatto pur mantenendo tutte le caratteristiche tecniche di resistenza agli agenti atmosferici e all'abrasione. A completare la collezione un piccolo ma funzionale tavolino con il piano in Corian, utile come supporto e per creare visivamente degli originali punti di interruzione sulla linea continua delle sedute.

The Churros collection expresses and integrates two essential concepts for contemporary seating: the ease of use and the modularity of composition, responding fully to the evolved furnishing needs, especially in the contract sector. Churros is made with the innovative Polyplus polyurethane, suitable for outdoor use, with a smooth and soft texture to the point of being appreciated precisely for its soft, comfortable and compact appearance while maintaining all the technical characteristics of resistance to atmospheric agents and abrasion. To complete the collection, a small but functional table with Corian top, which creates original breakpoint on the continuous line of the seating.

Gotham

Dario Delpin

Gotham può sembrare una goccia, una fenditura lineare e slanciata, un taglio per la presa e l'ancoraggio oppure uno spiraglio da cui è possibile osservare attraverso. Gotham è nata così con quel suo segno grafico distinto e ben riconoscibile che nelle diverse versioni, ha assunto significati e funzioni diverse, rafforzano la sua identità senza mai apparire invadente. Nata nel 2010 dall'idea di Dario Delpin, questa seduta ha dimostrato di saper attraversare le mode del momento presentandosi di fatto sempre attuale senza mai tradire le proprie caratteristiche distintive: la delicata curva della sua sagoma, il segno grafico aggraziato e gentile e la sensazione avvolgente e accogliente della seduta. Concetti così semplici eppure non scontati che rendono questo elemento d'arredo originale pur essendo estremamente lineare, passepartout per diverse collocazioni e adatto ad ogni destinazione d'uso.

Gotham It may look like a raindrop, a slender linear cut, an opening for gripping and for anchoring or even a window from which you can look through. Gotham was born like this, with this distinct and recognizable graphic detail which, in different versions, takes on different meanings and functions, strengthening its identity without ever appearing excessive. Created in 2010 from an idea of Dario Delpin, it has proven to be able to stand strong against passing fashions by being always mod- ern without ever betraying its distinctive features: the delicate curve of its silhouette, its graceful graphic detail and the feeling of snugness and coziness of the seat itself. Simple concepts, but never conventional, which make this piece of furniture completely original notwithstanding its extreme linearity, and make it suitable for any setting and for every purpose.

Faggio - Beech

Base in legno di faggio verniciato oppure laccato bianco o nero, scocca in poliuretano rigido Tech.

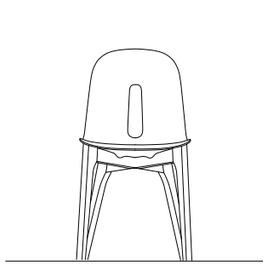

Polished or matt lacquered beech wood base, rigid polyurethane Tech shell.

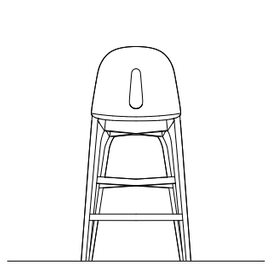

La collezione Gotham W si presenta con la base in legno di faggio verniciato naturale, noce, moka oppure laccato nero o bianco. Le finiture, in tutti i casi, sono disponibili nella variante opaca, estremamente calda e naturale.

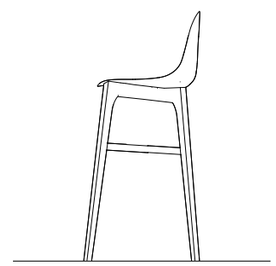

L'abbinamento del poliuretano con il legno della base rende la seduta adatta ad ambienti intimi, come interni domestici o ristoranti che vogliono offrire un'atmosfera calda e accogliente. La scocca in Tech® garantisce una elevata praticità d'uso essendo molto resistente ai graffi, all'usura e facilmente pulibile.

The Gotham W collection has a base in beech wood varnished natural, walnut or moka, or lacquered black or white. Finishes, in all cases, come in matte, which looks extremely warm and natural.

The combination of polyurethane with the wood of the base makes these seats suitable even for intimate ambiances, such as home interiors or restaurants that want to offer a warm and welcoming atmosphere. The seat's body in Tech® is extremely user-friendly being very resistant to scratches and wear, and easy to clean.

Gotham Woody

Dario Delpin

Gotham Woody Sled è una elegante collezione di sedute, sgabelli e lounge con scocca in noce e base a slitta in metallo verniciato nero. Questa famiglia di varianti molto articolata, interpreta la scocca in chiave contemporanea accostando il pregio dell'essenza noce alle linee disinvolte e leggere del metallo. Arricchiscono ulteriormente l'intera gamma le versioni imbottite, realizzate con dettagli molto particolari. Il tessuto infatti, non solo impreziosisce e rende morbida la seduta, ma evidenzia il profilo stesso della scocca, sottolineando, con un sottile bordo in rilievo, il caratteristico dettaglio a goccia della Gotham.

Gotham Woody Sled is an elegant collection of chairs, stools and lounge chairs with a walnut shell and a black painted metal sled base. This highly articulated family of variants interprets the wooden shell in a contemporary way by combining the excellence of the walnut wood with the light and casual lines of the metal. The full range is further enriched by the upholstered variants, made with very exclusive details. The fabric not only enriches and softens the seat, but also highlights the whole profile, emphasizing, with a thin embossed edge, Gotham's characteristic raindrop detail.

Jujube

Antonio De Marco

Simone Fanciullacci

Jujube, è una gamma completa di sedute, divani, poltrone e poltroncine che si abbinano in molteplici soluzioni come un vero e proprio sistema modulare d'arredo. L'elemento decorativo che contraddistingue l'intera collezione è lo schienale in metallo con disegno a rete leggero e avvolgente.
Estremamente flessibile nella sua componibilità, Jujube è molto eclettica anche nella varietà delle finiture. I materiali sono realizzati per la destinazione in outdoor come la verniciatura zincata, tuttavia, la ricerca materica così originale e raffinata, fanno della collezione Jujube un complemento d'arredo anche per l'interno con la trapunta imbottita e l'ampia gamma di tessuti colorati che si adattano a diversi stili di interior design.

Jujube is a seating system consisting of modular elements which are combined each other to realize different types of seats. The tubular backrest, designed with metal rods, is the decorative element that characterize this collection, realized with materials and finishes resistant to weathering.
The materials and finishes are fit for both the outdoor and the indoor use, because of the galvanized coating, the laminated larch, the weaving in nautical rope and the UV tested fabric, and resistant to humidity. The selection of refined and original materials, make the Jujube collection an authentic piece of furniture also for the indoor use, with the padded back and the wide range of colorful fabrics that adapt to different styles of interior design.

Klot

AM Studio

Klot è una collezione di sedute in metallo caratterizzate dall'intreccio con corda nautica, disegnata dallo studio AM. La forma è avvolgente e leggera, ideale per esterni di bar e ristoranti dallo stile contemporaneo e raffinato. La collezione si completa anche con gli sgabelli per un coordinato perfetto. Il fusto è in due colorazioni: antracite e sabbia. Particolare attenzione è riservata all'abbinamento con le corde, anch'esse ispirate alle tinte naturali del grigio e del blu. Vi sono anche le varianti melange sui toni del blu e del beige da abbinarsi al fusto per un effetto tono su tono o a contrasto per evidenziare maggiormente la finitura ad intreccio.

Klot is a collection of metal seats characterized by the weaving with nautical rope, designed by AM studio. The shape is enveloping and light, ideal for exteriors of bars and restaurants with a contemporary and refined style. The collection is also completed with stools for a perfect coordinate. The frame is available in two colors: anthracite and sand. Particular attention is paid to the combination with the ropes, also inspired by the natural shades of gray and blue. There are also melange variants in shades of blue and beige to be combined with the frame for a tone-on-tone or contrasting effect to further highlight the weave finish.

Millie

Studio Pastina

Un effetto multi righe leggero creato da cordini sottili è il tema decorativo della collezione Milly disegnata dallo studio Pastina per le nuove proposte Chairs & More da esterno. Le sedute sono ispirate agli anni 70 con scelte di colore naturali come il sabbia e il grigio antracite in abbinamento alle corde grigio chiaro o scuro, marrone o blu midnight.

A light multi-striped effect created by thin cords is the decorative theme of the Milly collection designed by the Pastina studio for the new Chairs & More outdoor collection. The seats are inspired by the 70s with natural color choices such as sand and anthracite in combination with light or dark gray, brown or midnight blue ropes.

Mousse

Tommaso Caldera

Morbida, soffice e dolce come le sue forme, Mousse è una seduta golosa che attira a sé l'attenzione e soddisfa il palato di chi apprezza i sapori nuovi ma senza rinunciare alla tradizione. Ideata dal gusto fresco e creativo di Tommaso Caldera, la seduta Mousse rivisita, in chiave contemporanea, lo stile classico della poltrona da living adatta a interni residenziali come a bistrò e ambienti lounge. La collezione, infatti, si articola in due varianti che si abbinano in modo armonioso ed equilibrato: la Mousse SP, più alta e contenuta, e la versione Mousse P avvolgente e adatta a zone relax e waiting hall. Entrambe le sedute, dal sapore lievemente retrò, si apprezzano anche per il particolare abbinamento di tessuti che possono prevedere gli interni in una tinta differente dagli esterni e la possibilità di comporre la seduta con materiali diversi come la stoffa ignifuga e l'ecopelle, ingredienti anche questi indispensabili per personalizzare in modo creativo e unico la propria Mousse.

Soft, pliable and as sweet as its shapes, Mousse is a delight for the eye, a luscious seat that tickles the palate of whoever appreciates new flavours without forsaking tradition. The fruit of Tommaso Caldera's fresh, innovative style, Mousse adopts a more contemporary approach to revisit the classic living room armchair, resulting in a seat that is ideal for both homes and public areas such as bistros and lounges. The collection consists of two variants that can complement each other in a graceful and harmonious fashion: Mousse SP is a more upright, slender seat, whereas Mousse P is more enveloping, and therefore ideal for relaxation areas and waiting halls. Both models, elegant with a hint of retro, come in a wide array of furnishing fabrics, which can be combined to create seats juxtaposing two shades of colour at the front and back and sides, respectively, or even different types of material, including fire retardant fabric and eco-leather. This rich variety of ingredients is the key to customising one's Mousse in a creative and unique fashion.

Moyo

Antonio De Marco

Simone Fanciullacci

Moyo è una seduta per esterno realizzata in metallo. La forma è affidata ad un unico segno, una linea che per tutto il suo percorso, rimane identica a se stessa e senza interruzioni dà origine ad una seduta dal sapore primordiale, morbido, quasi materno. Anche i colori materici e naturali comunicano l'idea di leggerezza e comfort avvolgente. Moyo è proposta nella versione in metallo e in quella con intreccio in corda nautica che rende la seduta molto comoda ed elegante.

Moyo is an outdoor chair made in metal. The shape is obtained by a single sign, a unique line that seamlessly creates a priomordial seat, soft almost maternal. Even the material and natural colors evoke ancestral feelings and communicate in an elementary way the idea of lightness and enveloping comfort. Moyo is proposed in the metal version and with nautic rope weaving which make able seat very confortable and elegant.

Nube

Roberto Paoli

Uno spirito informale, estroso, quasi ironico è quello che ispira la collezione Nube: una collezione articolata di sedute e sgabelli disegnati da Roberto Paoli e realizzati con un particolare poliuretano morbido che funge quasi da imbottitura. Il design è anch'esso sinuoso con le linee curve e tondeggianti dello schienale e il sedile molto simile a un cuscino in tessuto ma più pratico in quanto realizzato in Freeform e quindi resistente ai graffi, facilmente pulibile e ignifugo.
Le basi sono di tre tipi, oltre alle versioni in metallo a 4 gambe: Nube S e a slitta laNube SL, è proposta anche la versione Nube W molto particolare con basamento in fag- gio naturale tornito che sottolinea ancora di più lo stile anni Settanta evocato dalla collezione. Nube è disponibile in 5 diverse colorazioni: Black, White, Mud, Yellow e Red.

An informal, whimsical, almost ironic spirit seems to tran- spire from Nube, a comprehensive collection of chairs and stools designed by Roberto Paoli.
The material employed is soft polyurethane, mimicking upholstery to perfection. The design is very sinuous, characterised by the rounded curves of its back, and a seat that has all the advantages of padding without its drawbacks. This latter element is made in Freeform, a fire-proof, scratch-resistant material that is also extremely easy to clean.
Three types of bases are available: Nube S is endowed with metal legs, Nube SL has a sled base, and the most striking version of all Nube W has rounded beech sheaths fitted over its metal legs, a feature that strongly enhances the Seventies look evoked by this collection. Nube is available in five different colours: Black, White, Mud, Yellow and Red.

Faggio - Beech

Scocca in poliuretano Freeform ignifugo e morbido. Gambe in legno di faggio verniciato naturale oppure laccato opaco nero o bianco.

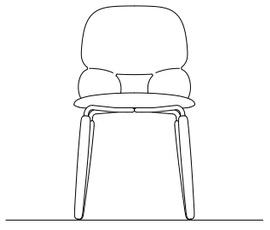

Soft and fire retardant Freeform polyurethane shell and natural polished or matt lacquered black or white beech wood legs.

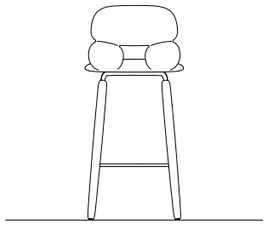

L'abbinamento dell'essenza del faggio e del metallo impreziosisce e connota questa variante W della collezione Nube. Il legno è disponibile sia con finitura naturale che laccata opaca in nero o bianco, quindi in contrasto o in abbinamento con il tondino di metallo.

I materiali si innestano armoniosamente sia alla base della seduta che nel poggia piedi degli sgabelli con accurati dettagli di lavorazione che valorizzano l'intera estetica della seduta.

The combination of beech wood and metal embellishes and characterizes this variant of the Nube collection. The wooden parts come with either a natural finish or varnished matt black or white, so as to effectively contrast or match the metal frame of the leg.

The various parts, footrest included, are elegantly joined together, and these well-crafted details contribute to the overall eye-catching aesthetics of Nube W.

So-pretty

Dario Delpin

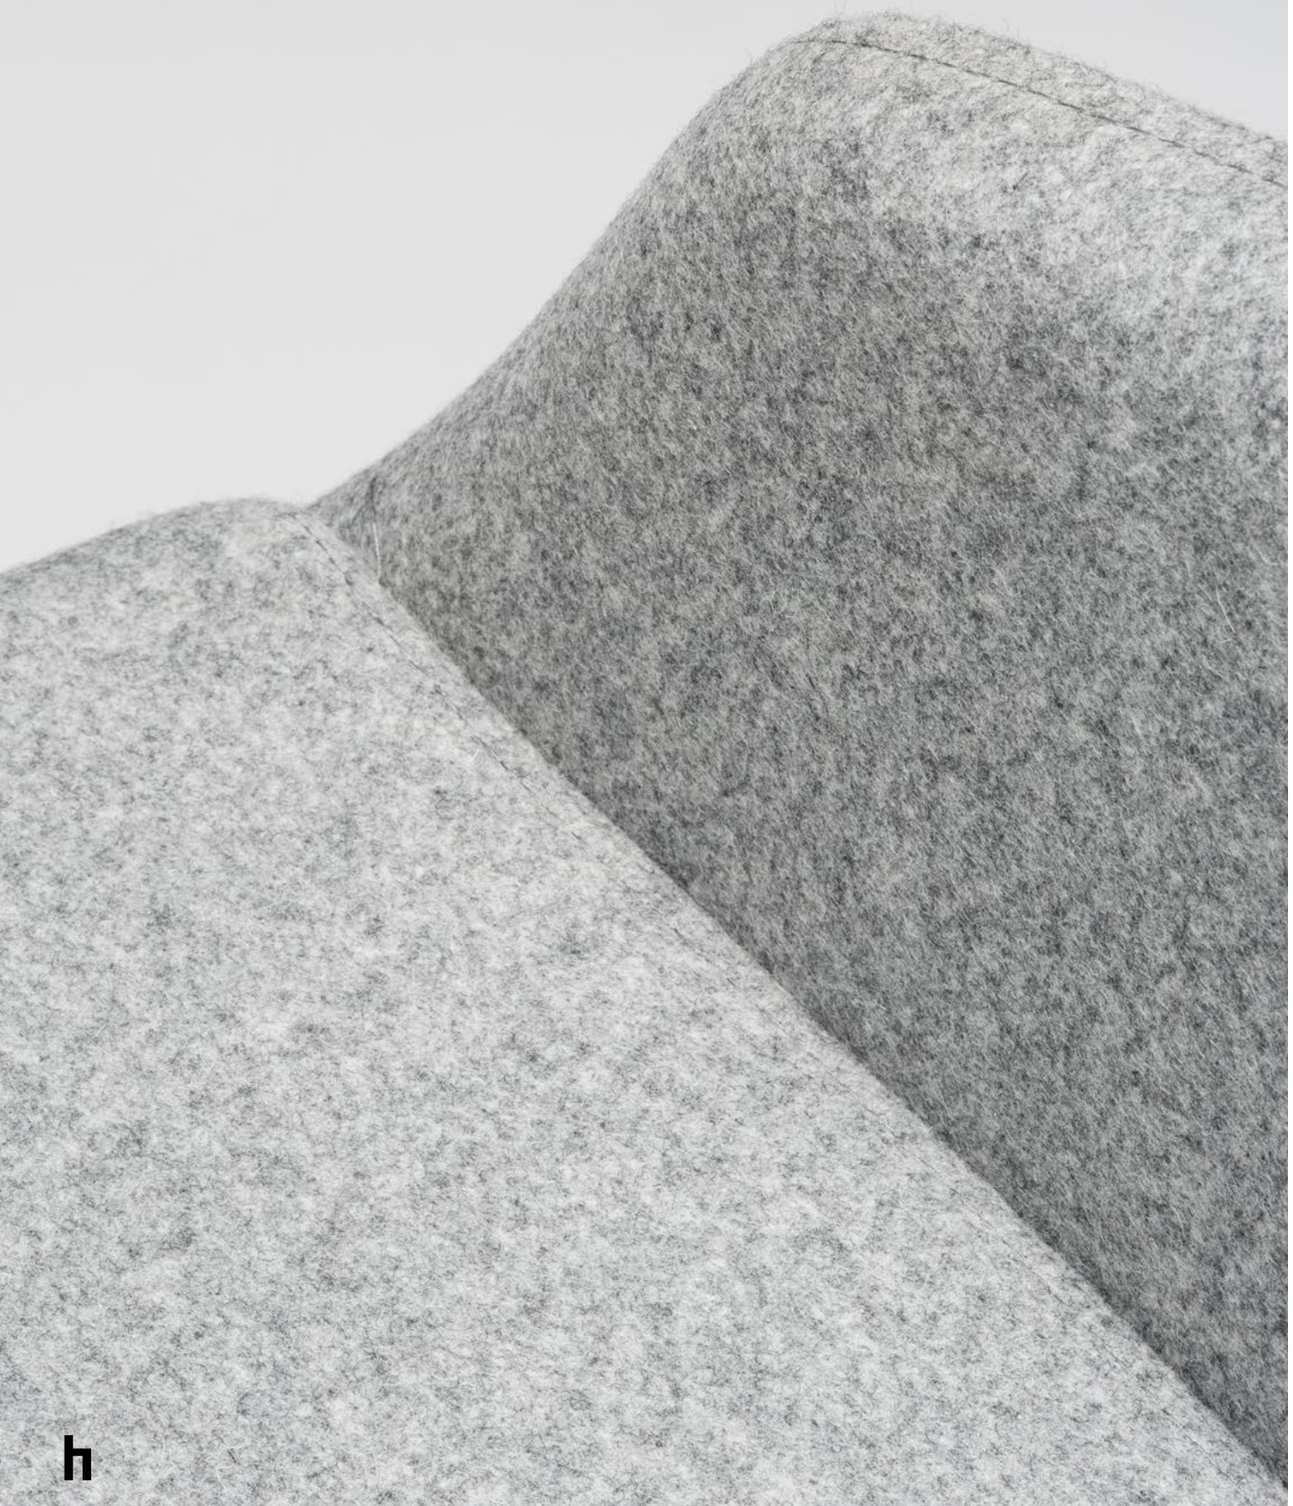

Eclettica, dinamica ed estremamente comoda, la poltroncina So-pretty cattura l'attenzione per il suo design morbido e sinuoso. Sono diversi gli ambiti di collocazione di questa seduta che compatta e avvolgente può trovare spazio sia in aree attesa, in sale ristorante e in zone living residenziali o uffici. La poltroncina ha struttura in acciaio rivestita in poliuretano schiumato a freddo ed è foderata con tessuti di vari colori.

Eclectic, dynamic and extremely comfortable, the So-pretty armchair catches the attention for its soft and sinuous design. There are several areas of location for this compact and enveloping armchair that can find space both in waiting areas, in restaurants and in living or office areas. The armchair has a steel frame entirely moulded with cold-cure polyurethane, upholstered with different fabrics.

Tamburo

La collezione di tavolini Tamburo, disegnata da Antonio de Marco, è caratterizzata dalla combinazione di diversi materiali che ne fanno un oggetto adatto all'arredo di spazi outdoor oppure indoor. La struttura è in acciaio verniciato a polveri in colore antracite e si adatta perfettamente al piano in HPL disponibile in diverse tinte. L'intreccio è fatto a mano con corda marina resistente alle intemperie e ai raggi UV. L'abbinamento di diversi colori di filato ha permesso la realizzazione di una corda dai toni mélange prodotta in esclusiva per Chairs & More.

The Tamburo coffee tables collection, designed by Antonio de Marco, is characterized by the combination of different materials that make it an object suitable for the furnishing of outdoor or indoor spaces. The structure is made of anthracite powder coated steel and perfectly matches the HPL tops available in different colours. The weave is handmade with marine rope resistant to weather and UV rays. The combination of different colours threads has allowed the creation of a mélange tone rope produced exclusively for Chairs & More.

Tulip

Kazuko Okamoto

Tulip è una collezione di poltroncine multifunzione che per il design e le varianti a disposizione, si propone come un nuovo concept di seduta.
Tulip nasce in due varianti che differiscono, per dimensioni, forma ed ergonomia. Tulip small, regolare e simmetrica, è una poltroncina adatta a diversi ambienti: sale da pranzo, uffici, zone relax o sale d'attesa. A seconda della sua destinazione, può essere accessoriata da un tavolino in metallo. Tulip large è una seduta completamente innovativa, caratterizzata da una forma asimmetrica e da un pratico tavolino estraibile, elementi che invitano a un suo utilizzo operativo e confortevole come la consultazione di strumenti informatici, la lettura o il consumo di cibi e bevande. La seduta è realizzata in poliuretano integrale morbido e colorato, con una piacevole sensazione al tatto. Le gambe sono il legno di frassino verniciato naturale.

The Tulip collection is a series of multifunctional armchairs that represent a new concept in sitting. Tulip comes in two variants -Small and Large- and they are differ not only in size but also in shape and ergonomics. Tulip Small, regular and symmetrical, is a chair placed in different environments: catering, meeting room, waiting. Depending on its destination, can be equipped with a small metal table. Tulip Large is an innovative new seat, featuring an asymmetrical shape and a handy pull-out table, elements that invite peolple to use a tablet or laptop, read or consume food and drink. The shell is made of a soft and coloured integral polyurethane, with a nice sensation to the touch; the legs are in natural polished ash wood.

Legenda

PT - Poliuretano TECH® ignifugo classe 2 italiana UNI 9177:2008
Classe inglese BS CRIB 7 (5852:2006).
Classe inglese BS CRIB 5.
Invecchiamento accelerato con lampada UV ASTM G 154-06 (agenti esterni); Solidità del colore allo strofinio (EN ISO 11640:1998).

PT - Poliuretano TECH® polyurethane in fire resistance british standards BS CRIB 7 (5852:2006).
British standard BS CRIB 5.
Accelerated ageing with lamp UV ASTM G 154-06 (outdoor agents);
Resistance of colour to friction (EN ISO 11640:1998).

PFF - Poliuretano integrale Free Form ignifugo: Classe 1IM italiana, D.M. 26-06-84 art. 3 mod. D.M. 03-09-01.
Classe inglese BS CRIB 5.
Invecchiamento accelerato con lampada UV ASTM G 154-06 (agenti esterni).

PFF - Free Form integral polyurethane fire retardant; Italian class 1IM UNI 9175 (1987) - UNI 9175/Fa1 (1994).
British regulations 1988 n.1324 schedule 1, part 1 and amendment n. 2358 (1989), BS 5852 CRIB 5.
French M4.
Accelerated ageing with lamp UV ASTM G 154-06 (outdoor agents).

PS - Polyplus soft impermeabile, atossico, igienico, inattacabile dalle muffe, ignifugo classe 1IM italiana, UNI 9175:2010 BS 2852-2:1998.

PS - Polyplus soft waterproof, , igienic, fire retardant; Italian class 1IM UNI 9175:2010.
British regulations 1988 n.1324 schedule 1, part 1.

PB - Polymer Baydur® 110 tecnopolimero microcellulare compatto per stampaggio a reazione e iniezione (RIM).
Ottima resistanza alle sollecitazioni meccaniche.
Autoestinguente classe V-0

PB - Compart micro-cellular techno-polymer for reaction and injection moulding (RIM).
High rigidity and mechanical resistance standard. Certified VO class fire-retardant.
